

THE SOLUTION FOR YOUR MINING

**IN THE HEART OF THE REVEST
QUARRY!**

"SOMECA REVEALS ITS SECRETS"

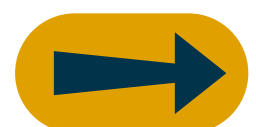

EXTRACTION EXPERTISE AND SOFTWARE INNOVATION AT THE
SERVICE OF THE EXTRACTIVE INDUSTRY

1.

LEADER IN THE EXTRACTION OF BUILDING MATERIALS

SOMECA, recognized as the leader in the Var region, excels in the production, sale, and transportation of construction materials. The company stands out for its rigorous quality control and commitment to sustainable practices. Through numerous initiatives, **SOMECA** demonstrates its dedication to environmental preservation and the implementation of innovative technologies for cleaner, more durable, and efficient extraction processes.

2.

OPEN HOUSE EVENT

On Saturday, June 8th, SOMECA opened the doors of the Carrière du Revest quarry to the public, offering a unique opportunity to explore the behind-the-scenes operations of construction materials extraction. This open house event, with free admission, allowed visitors to understand the importance of aggregates in our daily lives. Attendees discovered the company's multiple commitments to environmentally responsible extractive practices through various stands and on-site activities. The high quality of organization was evident during this event, and we extend our congratulations to the SOMECA teams!

3.

SUCCESSFUL COLLABORATION: A CASE STUDY

Our collaboration with SOMECA operates at two levels. At the macro level, our CORALIS “Land” solution provides company leadership with informed insights regarding land management across all sites. At the site-specific level, we offer services to help operators make informed decisions for each location’s future. This behind-the-scenes work promotes project acceptance by reducing environmental impacts while optimizing industrial processes. Additionally, our online platform, ATLAS, empowers all responsible parties to access the latest technical and administrative information, enhancing autonomy and efficiency.

4.

A PARTNERSHIP FOR A SUSTAINABLE FUTURE

In conclusion, SOMECA's open house event showcased the company's exemplary sustainability practices and career management. Our partnership with SOMECA involves direct support for operators in the field, along with an online platform to streamline information access and productivity. This collaboration serves as a tangible example of how technology can foster both effective and responsible industrial practices.
